

8 Tips for a GREAT Party

- 1) Plan your live entertainment (that's me!) to begin about 30 minutes after your party starts. This way if anyone is running late they will still arrive in time to see the most memorable show where your child is the STAR!
- 2) Set the room temperature cooler than usual. A room full of children will increase the room temperature and can make some kids sleepy and ill mannered.
- 3) Please turn off any TV's, radios, etc. during the show. And if there will be adults talking to each other during the show, perhaps they can move their conversation to a different room.
- 4) Pre-light the candles! They will re-light easier when it is time, will be easier for your child to blow out and you will already have your lighter or matches ready near the cake.
- 5) Ready? Action! Where's the camera? Check your film supply and be sure to capture those great Kodak moments during the show. And don't forget to take a picture of the cake!
- 6) Have a cleared area for the children to sit and watch the show. I bring my own equipment and require only a reasonable space to perform.
- 7) Please remove the pets from the performance area as they can be a distraction during the show. Thank you!
- 8) Put some balloons on the mailbox so guests can easily find your home and let them get ready for a Fun, Exciting and Memorable party!
